PROJECTS

Beauty Advisor Sales Tracker, live

sales-management-phi-blue.vercel.app | github.com/khalidduaa1-byte/Sales_management

Python, Supabase, PWA, data modeling, dashboarding

- Shipped a sales tracker to 18 beauty advisors across Cairo, Sharm and Hurghada for Dolce & Gabbana, replacing manual Excel-based sales reporting, and onboarded roughly 20 field users into sustained daily use without it being mandated.
- Built the ingest pipeline that de-duplicates the supervisor export on advisor, date, store and shift before any KPI is calculated: 1,324 rows ingested, 0 rejected and 29 duplicates removed in one full run from January to April.
- Presented to global beauty leadership to make the case for keeping the work in house.

Move-Out Sale site and tracker

Python

- One script produces the buyer-facing catalog and the internal profit tracker from a single item list, so the listing and the accounting cannot disagree.
- 20 of 31 items sold in 30 days, AED 8,400 recovered against AED 10,688 paid, a 78.6% recovery rate.

Homebase, property management MVP for Dubai (hackathon, 2 person team)

homebase-labs.lovable.app

Next.js, React, Tailwind, Firebase/Firestore

- Co-founded and defined product scope end to end, shipping a CRUD app over six Firestore collections with the data model and dashboard flows.
- Owned the UAE rental regulation model the product was designed around, covering RERA bands, the 90 day notice rule, Ejari sequencing and the bilingual EN/AR requirement. The RERA, WhatsApp and agent automation layer was scoped as vision and explicitly out of the MVP.
- Chose a deterministic template as the default path with the model behind an opt-in flag, so the product's behaviour stayed predictable where correctness mattered.

EXPERIENCE

Dolce & Gabbana Beauty

Customer Success & Key Account Manager, Travel Retail Middle East

Dubai, UAE | Mar 2024 to Present

- Grew net revenue 48% and sell-through 44% YoY (FY2025 vs FY2024) across a 13-market account portfolio (GCC, Levant, Egypt) worth roughly \$2.5M in annual sell-out, by prioritizing accounts on usage data and reallocating supply to live demand signals, an expansion and net-revenue-retention motion. 2026 year to date is +26% against 2025.
- Built the health-monitoring layer for the portfolio: designed and shipped a multi-market sell-out tool that consolidates fragmented partner data, benchmarks account performance, and flags at-risk accounts, now the primary decision input for allocation across all 13 markets.
- Ran quarterly business reviews and renewal negotiations with duty-free partners on visibility and assortment, translating account insights into placement wins and retained revenue.

- Onboarded and enabled a 30+ person field team with structured ramp-up and performance tracking, standardizing customer execution across markets.

LVMH Fragrance Brands

Account Management & Commercial Operations (Travel Retail, MEAI), Givenchy & Kenzo

Dubai, UAE | May 2022 to Mar 2024

- Cut account order-cycle time from 45 to 5 minutes (~89%) across 30+ MENA locations by acting as product owner for a sell-in decision-support tool, iterated over two years on direct user feedback, a self-service adoption win for the account teams.
- Improved forecast reliability and order accuracy by defining requirements, prioritizing the roadmap, and running feedback loops with the account managers who used the tool daily, as the single point of contact across retailers, marketing, demand planning, and supply chain.

LVMH Fragrance Brands

Supply Chain & Operations Coordinator, Benefit, MUFE, Givenchy & Kenzo

Dubai, UAE | Oct 2021 to May 2022

- Reduced out-of-stocks and aged inventory across MENA accounts by monitoring stock and logistics flows and aligning replenishment to promotional calendars.

EDUCATION

Cornell Tech, Master of Engineering, Data Science & Decision Analytics (DSDA)

New York, NY | Aug 2026 to May 2027

City, University of London, MSc Global Finance, Merit

London, UK | Sep 2023 to Aug 2025, part-time alongside full-time work

University of Sharjah, BSc Industrial Engineering & Engineering Management

Sharjah, UAE | Sep 2018 to May 2021

CGPA 3.95/4.0, Dean's Honors List (all years); Chancellor's List Medal 2018 (Year 1 at American University of Sharjah)

SKILLS

Customer Success & Account Management: Retention & churn reduction, account expansion / upsell, onboarding & enablement, QBRs, renewal negotiation, stakeholder management, customer health monitoring, voice of the customer

Product & Analytics: Product strategy, roadmap prioritization, requirements gathering, KPI definition, MVP scoping, dashboard design, data-driven decision-making

Technical: SQL, Python, Advanced Excel, SAP, Git; Next.js, React, Firebase/Firestore, Supabase; data modeling, LLM-assisted development, AI evaluation (human + log-based)

Languages: English, Urdu, Hindi (fluent); French (basic)
